

Greetings from Kindergarten: Things have really been hopping around our rooms! First of all, thank you to everyone who came to "Meet the Teacher Night." We had a great turn out!

We have been working hard on learning the school and classroom rules. Just being here all day can be a task for a kindergartener. They are coming along, keep up the good work!

In math, we are counting and learning our numbers. We spend time learning how to make the letters correctly. Also, we are starting to learn our shapes, patterning, and graphing. Help your child by having them count objects out.

Identifying letters and learning the sounds has been a big focus. The students are starting to make connections. Ask your child what sound the letters make while practicing the abc's. Also, have them name something that starts with that letter. If your child is able to start connecting the sounds to make words that is awesome. Get them a notebook and start trying to write words!

We will be learning about the five senses in Science. We will also be talking about ourselves and our families in Social Studies. Learning about each other is great!

Continue to check folders each night for important information.

Thanks for your support,

JoDeen Bunker & Deb Bull
